

Abstract

Today, with the non-observance of the local urban planning, our cities have been identity crisis; and whatever is going on in the wider and deeper the crisis. On the same topics, symbols of urban infrastructure in urban or important elements in terms of architecture and design are inside the city and our experience in the domain of a contract between the citizens, has meaning, even to the manner of the time the significance of the effects more to city because it reflects the personality and identity of the city, in an extract of the structure are observed. So the goal was examining the role of urban symbols in the development and advancement of the status of the city of Zabol. To achieve this purpose, the data collection required detailed studies through a library research and the use of the documents and view and harvest field will be doing and then to analyze the findings of the PUA techniques and GIS software has been used. The results indicate that most people are the main component of the historical symbols of symbols they know can be an effective role in the development of the position of the city of Zabol.
