

Analysis of Pattern Lifestyle Rural's Frontier of Zahak County

Abstrac

Different styles of life are an integral part of human life .These styles have elements and features of the modern human such as authority, and freedom. On the other hand, technological and communication advances in recent decades, increasing the relationship between rural community urban, physical–social space of villages to towns show that these zones were a symbol of tradition and traditional systems of stratification that appeal to this phenomenon. current situations development of targeted rural ,and planning for the future requires knowing new issues in the socio-cultural in lifestyle .The aim of the study was to assess the environmental and virtual spaces effects on Lifestyle villagers in the central part of Zahak County. The method of this research is a combination of field and descriptive analytical methods. Sample of study was the population of the central part of Zahak County, including khaje Ahmad and Zahak. According to the Statistical Center of Iran's population living in rural were 40629 that live in 92 villages of Zahak County in 2011. Cochran formula used to determine sample size by a confidence interval 95/0 and choose 380. Excel and SPSS software was used for analysis. T test showed the lifestyle of the villager's frontiersman of Zahak city is based on consumption of foreign goods, sperman coefficient show cyberspace in rural life style is less than other factors.
